ABSTRACT

As a quarterly publication announcing the availability of vocational and technical education instructional materials assembled by the Center, the document is of particular interest to teachers, curriculum specialists, and educators directly related to classroom instruction. In a 200-word condensation of each report, the abstracts attempt to present the means used to develop the material, its purpose, teacher competency, student requirements, and a description of supplementary materials, if available. Author, subject, and document number indexes provide entry to the abstracts. This issue continues the expanded announcement of career education materials in AIM, as career education provides a focal point in American educational curriculum revision. (AG)

Finding and using relevant information frequently is a major task for curriculum specialists, teachers, administrators, and students. The Center for Vocational and Technical Education is dedicated to making useful and vital information accessible so that educators may use it to improve school practice.

The Center quarterly assembles, under one cover, instructional materials relevant to the field of vocational-technical education. We are indebted to our colleagues within the profession for providing us instructional materials as they become available. We also appreciate the contributions of instructional materials laboratories, local school systems and professional associations such as the Vocational Instructional Materials (VIM) section of the American Vocational Association. Members of the profession are continually encouraged to forward instructional materials for possible inclusion in future issues of AIM to the Acquisitions Specialist at The Center.

HOW TO USE AIM

This volume of AIM (Abstracts of Instructional Materials in Vocational and Technical Education) has two major sections: resumes containing abstracts, and indexes.

Each abstract presents information about a document's content to help you to decide if you want to read the full text of the document. The abstract is part of the resume which provides information about the document, its source and availability. Abstracts are arranged in ascending VT-number order. A sample resume, preceding this Introduction, is explained in detail.

The indexes help you to locate the abstracts by page numbers and VT numbers. These indexes are: Subject Index, Author Index and Conversion of Document Number Index. Index terms used in the subject index are ERIC descriptors. Each document has been assigned several of these descriptors; therefore, each document title appears in the subject index several times.

The full texts of documents are available from the original sources or from the ERIC Document Reproduction Service (EDRS) as microfiche or Xerox reproductions. Ordering information for AIM and EDRS reproductions is provided in a following section.

NEW CAREER EDUCATION EMPHASIS

Recent emphasis on career education as a major focus in reforming and redirecting the American educational structure has produced a flurry of activity in conceptualizing and developing effective programs. This activity is evidenced by the four major career education models and numerous state and local efforts. This issue continues expanded announcement of career education materials in AIM. Intensified acquisition efforts in this area have identified career education instructional materials which should be of great value to educators developing and upgrading their programs. Many of these documents are listed under "career education" in the subject index.

DOCUMENT ORDERING INSTRUCTIONS

All documents cited in this publication are available in their full text. Availability is by one of the options listed below:

1. ORIGINAL COPY FROM PUBLISHER OR SUPPLIER

These documents have an availability listed in the resume. Often such documents are not available by any other means.

2. MICROFICHE AND HARD COPY REPRODUCTIONS

Documents with ED numbers are usually available individually on microfiche (\$0.65 a title) or paper copy (xerox - \$3.29 per 100 pages or fraction thereof) from:

ERIC Document Reproduction Service (EDRS)
P. O. Drawer O
Bethesda, Maryland 20014

Orders must specify ED number. A sample order form follows on page 223.

3. MICROFICHE SETS

Documents with VT numbers only are not available as individual microfiche, but most are part of VT-ERIC microfiche sets.

A microfiche set contains all the documents announced in a single issue of AIM which are not available by one of the options outlined above. These documents are filmed continuously in VT number order, and each set is assigned a single ED number.

VT-ERIC microfiche sets are available

- a. In any complete collection of ERIC microfiche.
- b. As VT-ERIC microfiche sets purchased individually. (See page 225 for price lists of these sets)
- c. From institutions (e.g., state research coordination units) which have the VT-ERIC microfiche sets and are willing to provide microfiche duplicates of individual VT numbered documents.

Since ED numbers are assigned after announcement in RIE, ED numbers for the microfiche set corresponding to this publication can be obtained from future issues of AIM and RIE.
